Reminder: Submission of SY 2009-10 SIG Baseline Data into ESS

The EDFacts Submission System was recently enabled to accept most of the SY 2009-10 School Improvement Grant (SIG) files that were manually submitted by states last year. These files include: 159, 160, 166 and 167. The SIG program office plans to begin analyzing the SY 2009-10 data against the SY 2010-11 data once the baseline data are available in the system.

PSC has begun submitting these files on behalf of states. After checking to see if the state has already submitted an updated version of these files for SY 2009-10, analysts will submit the exact file that was e-mailed to PSC around this time last year. If there are format errors, PSC will correct these and resubmit. If there are validation errors, the analyst will send the file back to the EDFacts Coordinator to be corrected. This is because it may require a change to the data, and PSC is not authorized to alter state data.

Please let PSC know as soon as possible if you expect to be updating and resubmitting any of these SIG SY 2009-10 data prior to April 30, in which case, PSC will not submit the original baseline files into ESS. If you need to update the SY 2009-10 baseline school-level data for files 139 or 163, please send those files to PSC.

Support Issues, Solutions, and Metrics

The following is provided to give you some insight into issues being handled by your Partner Support Center (PSC):

New Issues Affecting Multiple SEAs

1. ESS – While attempting to validate SIG baseline data submitted on behalf of states, PSC discovered that the data will not display through the ESS front end, despite having received a 'Transmittal OK' upon submission. **Status:** There is a faulty query in a stored procedure resulting in the error message when the data are viewed through the front end. SI has identified the faulty query and corrected it in DEVNET. The correction is scheduled to be implemented in production by Friday morning.

There are no new or updated knowledgebase articles this week.
